

# CDPHP® Prescription Drug Lists

## Changes to covered medications

CDPHP is introducing new prescription drug lists (also known as a formulary) to ensure members have access to affordable, clinically appropriate medications while also addressing rising prescription drug costs. View the full formularies by visiting [www.cdphp.com/formulary](http://www.cdphp.com/formulary).

New formularies will go into effect as health plans renew, beginning July 1, 2025. The new formularies may cover new medications, change cost-sharing tiers (which can affect your out-of-pocket costs), and add or remove coverage restrictions, such as prior authorization. These changes do not apply to Medicare plans.

The table below shows medications currently covered that will not be covered under the new formularies.

| Name of Affected Drug                   | Covered Alternative Drug(s)                                   |
|-----------------------------------------|---------------------------------------------------------------|
| Acyclovir 5% cream                      | Oral acyclovir, famciclovir, valacyclovir                     |
| Adapalene 0.1% gel                      | Adapalene 0.1% cream                                          |
| Adapalene 0.1% solution                 | Adapalene 0.1% cream                                          |
| Adapalene-Benzoyl Peroxide 0.3-2.5%     | Adapalene-Benzoyl Peroxide 0.1-2.5%                           |
| Alrex 0.2% eye drop                     | Loteprednol 0.5% eye drop                                     |
| Alvesco inhaler                         | Arnuity Ellipta, Asmanex, fluticasone HFA, QVAR inhaler       |
| Amlodipine-atorvastatin tablet          | Single ingredient amlodipine and atorvastatin tablets         |
| Anucort-HC 25 mg                        | Hydrocortisone AC 25 mg                                       |
| Azelaic acid gel 15%                    | Several formulary acne treatments                             |
| Azelastine-Fluticasone 137-50 mcg/spray | Azelastine nasal spray, fluticasone nasal spray               |
| Azelex 20%                              | Several formulary acne treatments                             |
| Bepotastine 1.5% eye drop               | Azelastine eye drop, olopatadine eye drops                    |
| Betimol eye drop                        | Timolol eye drop                                              |
| Bijuva capsule                          | Single ingredient estradiol tablets and progesterone capsules |
| Bonjesta tablet                         | Talk with your doctor                                         |
